About Me

Accomplished Software Developer with over 2.5 years of hands-on experience in frontend development, specializing in React.js and micro-frontend architecture. Adept at building scalable, high-performance web applications with a strong focus on clean, maintainable code. Demonstrates excellent problem-solving skills, keen attention to detail, and a proven ability to thrive in Agile environments—effective team player with a track record of successful collaboration across cross-functional teams to deliver impactful solutions.

Work Experience

KaptureCX | Software Developer

Jan 2023 - present

- **Role:** Frontend Developer working mainly on ticketing and order module in Kapture's core SaaS product. Also responsible for mentoring and guiding interns during live project development and delivery.
- **Responsibilities:**
 - Developed and maintained highly modular and scalable UI components using React, JavaScript, TypeScript, and Tailwind CSS, HTML/CSS.
 - Worked extensively on implementing and maintaining micro frontend architecture to improve code maintainability and deployment independence.
 - Collaborated closely with cross-functional teams to gather requirements, deliver features, and ensure alignment with product goals.
 - Guided new interns, performed code reviews, and ensured adherence to coding standards and best practices.
 - Participated in Agile ceremonies, sprint planning, and regular stand-ups to track progress and address blockers.
- **Achievements:**
 - Worked with micro frontend architecture to break down an extensive frontend application into smaller, independent, and deployable projects.
 - Recently awarded as the "Above and Beyond" employee by the manager for exceptional contribution and consistent work progress.
 - Delivered high-quality, client-approved features with minimal revisions, maintaining clean and maintainable code.
- **Technologies & Tools:** React, TypeScript, JavaScript, Tailwind CSS, Git, Agile/Scrum, REST APIs, Jira, Micro frontend Architecture

Timidly | Web Development Intern

Oct 2022 – Jan 2023

- **Role:** Developed responsive UI components using React and JavaScript, built a personal portfolio and photography site with Redux and basic Node.js. Additionally, I collaborated on design implementation and worked on improving performance and user experience. Also collaborated with the team to follow best coding practices and deliver clean, maintainable code.
- **Technologies & Tools:** JavaScript, HTML, CSS, Node, React, Redux

Education

Bachelor of Technology in Computer Science

ABES Institute of Technology, Ghaziabad, Uttar Pradesh

GPA: 8.9 / 10

Aug 2019 – July 2023

Projects

Project: [KaptureCRM – Large Scale CRM SaaS Software](#)

July 2023 – present

- **Role:** Frontend Developer working mainly on ticketing and order module in Kapture's core SaaS product.
- **About the Project:** KaptureCRM is a customer support automation platform designed to streamline service operations for businesses through intelligent ticketing, order management, and real-time analytics. The platform enables seamless third-party integrations and is used by enterprise clients across various domains.
- **Technologies & Tools:** React, TypeScript, JavaScript, Tailwind CSS, Git, Agile/Scrum, REST APIs, Jira, Micro frontend Architecture

Project: [AI Chatbot Plugin Interface](#)

May 2025 – May 2025

- **Role:** Designed and developed an AI-powered chatbot interface with smart slash command support featuring autosuggestions and command parsing.
- **About the Project:** An interactive and intelligent chatbot interface built using React and TypeScript, enhanced with innovative slash command suggestions like /weather, /calc, and /define. This UI component mimics modern chat platforms, guiding users with autosuggestions, intelligent command parsing, and helpful placeholder prompts.
- **Technologies & Tools:** TypeScript, JavaScript, Tailwind CSS, GitHub Copilot, Web Services APIs, React

Project: [Facebook Clone](#)

April 2023 – June 2023

- **Role:** Developed dynamic and responsive clone UI using React and CSS by managing user data and posts using MongoDB, and implemented authentication, state management, and real-time data rendering.
- **About the Project:** A full-stack social media platform replicating key features of Facebook, including user authentication, posting, likes, comments, and real-time feed updates. The project focused on delivering a clean UI and seamless user experience.
- **Technologies & Tools:** React, JavaScript, CSS, Git, Node, Express, REST APIs, MongoDB

Project: [E-Commerce Website from Scratch](#)

Jan 2023 – March 2023

- **Role:** Developed a full-stack e-commerce web application inspired by Amazon, featuring product browsing, search, cart, and order functionalities.
- **About the Project:** A full-featured e-commerce website replicating core functionalities of Amazon, including product listing, filtering, cart management, and responsive design. Developed a dynamic UI using React and JavaScript, with modular components and state management for seamless user interactions.
- **Technologies & Tools:** React, JavaScript, Tailwind CSS, Node, Express, MongoDB, Git, REST APIs, Web Services Apis

Skills

-
- **Technical Skills:** JavaScript, React, Redux, HTML5, Tailwind CSS, Git, Material-UI, Bootstrap, Micro-Frontends, TypeScript, Node
 - **Soft Skills:** Collaboration, Adaptability, Communication, Time Management, Attention to Detail
 - **Tools and Platform:** VS Code, Cursor, Chrome Developer Tools, Jira, Bitbucket, Postman, GitHub
 - **AI and Automation:** GitHub Copilot, ChatGPT, OpenAI API

Certificates

-
- **[“Above and Beyond” Certified Employee](#) – Kapture CX**
 - **[Kapture Hackathon Winner](#) – Kapture CX**
